Index

A

A year in "Starcraft" on Earth, April 1969, 14
Aluminum took man to the moon, October 1969, 4
Antarctic research, a prelude to space research, May 1969, 5
Apollo
  11 flight, First man on moon, October 1969, 34
  11—A day to remember, November 1969, 23
  11's moonquake detector, November 1969, 33
  Heat shield, Apollo 7, January 1969, 5
  How the Apollo came back home, March 1969, 22
  July 20, 1969—Interplanetary man, December 1969, 18
  Lunar surface experiments package, November 1969, 4
  Moon TV camera, May 1969, 20
  IX, Camera story of, June 1969, 26
  Portable life support system, July 1969, 4
  Reaction control for the project Apollo service module, March 1969, 34
  Off to work we go!—Blast off for Eisele, Cunningham and Schirra, January 1969, 18
  "Roadmap" to the moon for Apollo 8 astronauts, March 1969, 36
  Scientific objectives of, August 1969, 4
  7 guidance, navigation and control system, January 1969, 14
  Significance of, September 1969, 26
  Tracking the spaceships, January 1969, 8
Apollo launch, An artist goes to Cape Kennedy to draw an, November 1969, 19
Apollo/Saturn lunar landing program, July 1969, 13
Apollo/Saturn V—From ground test to flight, February 1969, 6

B

Bioscience programs in space, September 1969, 4
Bits of another world, September 1969, 35

C

Cosmodrome in orbit, A, July 1969, 42
Cosmonauts
  Khrunov, Yevgeny, April 1969, 32
  Shatalov, Vladimir, April 1969, 31
  Volynov, Boris, April 1969, 32
  Yeliseyev, Alexei, April 1969, 33

D

Dress rehearsal, August 1969, 32

E

EAI computer aided success of Apollo docking operation, August 1969, 30
Extraterrestrial civilization or a pulsating star?, April 1969, 36

F

Flights to other planets are becoming a realistic fact, October 1969, 27
Future lunar probes, 200 feet below moon's surface, December 1969, 45

G

Giant pancakes of laser light to measure precise distance to moon, October 1969, 30
'Gnomon', Brightly-painted wand, will land on moon with first man, July 1969, 10
Grand tour, The, December 1969, 16

H

Here's what's happening, September 1969, 43
Home is 200 miles up, September 1969, 16

I

Ion engine to be tested in orbit, June 1969, 7

L

Liquid hydrogen emerging as most powerful space fuel, April 1969, 11
LM landing radar, October 1969, 26
Lunar cameraman, August 1969, 34
Lunar module descent engine, The, October 1969, 40
Lunar prospector, Modern mule for, January 1969, 12
Lunar spacecraft, Alabama's simulated, August 1969, 28

Man and outer space, October 1969, 42
Manned space log, October 1969, 36
Mars, Viking exploration of, June 1969, 39
Meteors interest scientists—Could pose danger to astronauts, April 1969, 12
Moon, Beyond the, May 1969, 38
Moon findings, Dr. Urey talks about the, December 1969, 35
Moon glass, August 1969, 38
Moon, How we will communicate with astronauts on the, January 1969, 32
Moon rocket—Circa 1929, July 1969, 38
Moon, Science and the, May 1969, 32
Moon-suit, December 1969, 44
Moon, The legal status of the, October 1969, 14

N

NASA's 10th, May 1969, 14
New quests ahead, April 1969, 38
Nuclear rocket development station, December 1969, 4
Nuclear bulls-eye enables Apollo 9 astronauts to dock right on 'button', June 1969, 31

O

Orbiter refrain, The, September 1969, 24
Outer space helps man, October 1969, 38

P

Progress in science and cosmonautics, February 1969, 4

R

Radiation on the lunar path, April 1969, 34
Radio, Whatever happened to, March 1969, 16
Russian house in outer space, A, April 1969, 37

S

Satellites
  Communications, October 1969, 33
  Mariner—Past, present, future, September 1969, 47
  Mariners on way to Mars, Two, June 1969, 10
  Nimbus II, The accomplishments of, July 1969, 40
  Nimbus III, Global data collection system gets initial tryout with, August 1969, 18
  OAO-A2: High-accuracy stellar observatory, March 1969, 4
  Orbiting solar observatory, April 1969, 6 and November 1969, 42
  Telcomsat—world's largest, May 1969, 12
Satellites could improve living conditions on Earth, New, January 1969, 26
Satellite power, New 'windowshade' to harness sunlight for satellites power, June 1969, 38
Saturn 5 gave the Apollo 8 a leg up to the moon, March 1969, 31
Saturn V launch vehicle, October 1969, 8
Saturn V's performance during Apollo 9 flight, The, June 1969, 30
Seeing the invisible, August 1969, 21
Similarities in Mars, Venus and Earth, June 1969, 34
S-IVB rocket that took man to the moon, November 1969, 36
Soviet cosmonaut on cosmodromes of the future, January 1969, 7
Soviet space programme, New stage of, April 1969, 19
Soviet Union, Album, April 1969, 23
Space debris, May 1969, 36
Space exploration is vital to man's future, Why, September 1969, 31
Space exploration, Problems of, August 1969, 36
Space exploration worth while, Is, March 1969, 11
Space, How television works from, March 1969, 41
Space laboratories, Future belongs to, July 1969, 11
Space, Maneuver in outer, March 1969, 48
Space medicine, Cosmonautics and, June 1969, 36
Space, Precision maneuvering in, November 1969, 39
Space program, New ideas for industry and medicine from the, March 1969, 38
Space, Prospecting from, June 1969, 14
Space vehicles, Insulation for, October 1969, 37
Space, What's up in?, February 1969, 40
Spaceship, The "stage and a half", May 1969 22
Star trackers in fourth month of successful operation, August 1969, 20

T

Three to get ready, February 1969, 36
Topographers in outer space, January 1969, 16
Tracking station ten miles from launch pad keeps close watch on Saturn-Apollo, September 1969, 30

V

Venera (Venus) probes, A talk with the chief designer of, September 1969, 28
Venus, Automatic probes en route to, July 1969, 37

W

Water in space travel, June 1969, 8
We hail their courage, September 1969, 29
Weld of all, The toughest, April 1969, 42
West German's gas cloud study, June 1969, 12

Z

Zero G, The great promise of, October 1969, 16
Zond-5, Circumnavigates the moon and returns to the Earth, The probe, January 1969, 28
